

FLEXI-STRIP INSERT BL

Article number: 107093

This stripping cassette can be inserted into the frame of the FLEXI-STRIP without tools and is for the cross-section range 0.1 - 4 mm², with an adjustable stripping length of 3 - 18 mm. Due to the fine adjustment of the V-shaped blade, thin and thick cable insulation can be easily removed without damaging conductors. The geometry of the blade also makes it possible to remove the insulation from high-temperature resistant PTFE cables.
