

CABLE DETECTIVE

Article number: 111440

The Cable Detective, a test device for network copper cables to detect connection faults in assembled data cables and complete installations. All coaxial connections with BNC/TNC connectors, USB cables as well as all UTP/STP cabling with 6- or 8-pin modular connectors can be tested in seconds for interruptions, PIN assignment and short circuits, both for the individual conductors and for the shielding. With visual (LED) and acoustic fault indication, the lengthy, nerve-racking and expensive search for cable faults is reduced to a minimum with the 'cable detective'. Already over longer distances laid cables up to 200 m can be tested by only one person, in practical belt pouch, comprehensive operating instructions, for 9 volt E-block battery.

Length (mm)	187 mm
Width (mm)	110 mm
Height (mm)	47 mm
Weight (kg)	0,185 kg

Attribute	Value
Measured value memory	No
Suitable for	Telefon/ISDN
Execution	CATV-Tester (Kabelfernsehen)
Add-on unit can be bayed	Yes
With measuring head included	Yes
Display type	LCD/akustisch
Suitable for network protocol measurement	No
With PC/printer interface	No

GTIN: 4021103114407
