

JOKARI® CABLE KNIFE WITH STRAIGHT BLADE, , 8 - 28 MM Ø**Article number: 121011**

” Jokari® Cable Knives million times proven cable knives for round and longitudinal cut. Cutting depth individually adjustable via screw, so that damage to the inner conductors is excluded. Handles made of wear-resistant polyamide. Both the tips of the internal cable knives and the cutting edges of the attached bow blades are titanium nitride coated. At approx. 500°C, titanium nitride is vapor-deposited onto the cutting blade in the vacuum chamber using the PVD process. Due to the reduced surface structure and the extremely high hardness, excellent sliding properties and high wear or abrasion resistance are achieved. TiN-coated knives can be used with significantly higher durability and cutting performance. Standard version with enlarged set screw and with a straight blade of one from ø 8-28 mm.

Length (mm)	255 mm
Width (mm)	80 mm
Height (mm)	31 mm
Weight (kg)	0,094 kg
