

SELF-SEALING HIGH-VOLTAGE INSULATING TAPE UP TO 35 KV, COLOR BLACK, L X W 10 M X25 MM
Article number: 162841

Self-welding high-voltage insulating tape up to 35 kV, a cold-welding insulating tape made of polyisobutylene, provided with an easily peelable plastic release liner. Welds after processing under slight tensile stress to form a solid air- and watertight rubber layer, extremely stretchable (elongation at break 600 %) and conformable, permanently elastic, compatible with all materials for insulation and sheathing, wide application temperature range, very good electrical properties (esp. dielectric strength), UV-, ozone-, weather- and aging-resistant. Ideal for sealing, splicing, insulating and repairing current-carrying cables, mainly for voltage insulation of power cables up to 17 kV, very good repair properties even on heavy rubber hose lines, for waterproof sealing of electrical connections and terminals (e.g. TV satellite dishes), for fixing cables outdoors, corrosion protection of metal parts, also excellently suited for emergency repairs to radiators, water and engine hoses, vacuum cleaner hoses, drainage basins and pipes. Execution in the color black, 0.5 mm thick: WxL: 25 mmx10 m.

Length (mm)	100 mm
Width (mm)	24 mm
Height (mm)	24 mm
Weight (kg)	0,167 kg

Attribute	Value
Length	10 m
Material	sonstige
Color	schwarz
Fluorescent	No
Photoluminescent	No
UV-resistant	Yes
Width	25 mm
Strength	0.44 mm
Waterproof	No
Magnetic	No
Transparent	No
Double-sided	Yes

CIMCO Werkzeuge GmbH & Co. KG

 info@cimco.de • cimco.de

Self-welding/amalgamating	Yes
Temperature resistance	0 °C - 85 °C
Insulating	Yes
Suitable for high voltage	Yes
Self-extinguishing	No
Vulcanizing	No
Can be torn off by hand	No

GTIN: 5017374615094
