

CIMCASE PRO ELECTRIC B1T2

Article number: 178500

The CimCase PRO Electric B1T2 is a robust tool case for professional use in electrical installation. The PRO version with a 105 mm deep base tray offers additional storage space for tools, measuring devices, and accessories.

Inside, three functionally designed, interchangeable tool panels ensure clarity and flexibility. One panel has a holder for an L-BOXX Mini and a neoprene bag for safely transporting a spirit level, while two other panels are equipped with generous pocket holders for hand tools. The modular system allows individual adaptation to different areas of application.

The electric equipment (31 pieces) includes an extensive selection of VDE-insulated 1,000 V tools, a crimping tool system, cutting and stripping tools, and a structured small parts storage system with L-BOXX Mini (2 pieces). This makes the case ideally equipped for installation and service work in the electrical sector.

The case also features a TSA combination lock, a labeling field, and a spring-loaded handle.

Length (mm)	495 mm
Width (mm)	260 mm
Height (mm)	420 mm
Weight (kg)	11,4 kg
