

CIMCASE PRO TROLLEY ELECTRIC B1L2

Article number: 178601

The CimCase PRO Trolley Electric B1L2 is a robust tool case for professional use in electrical installation. The base tray, which is up to 150 mm deep, offers maximum capacity for extensive tool equipment, drill bits, measuring devices, and accessories. Thanks to the integrated trolley function with extendable handle, the case is particularly suitable for longer distances on construction sites or in industrial plants and ensures comfortable transport even with heavier weights. Inside, three functionally designed, interchangeable tool panels ensure clarity and flexibility. One panel has a holder for an L-BOXX Mini and a neoprene bag for safely transporting a spirit level, while two other panels are equipped with generous slat holders for hand tools. The modular system allows individual adaptation to different areas of application.

The electric equipment (31 pieces) includes an extensive selection of VDE-insulated 1,000 V tools, a crimping tool system, cutting and stripping tools, and a structured small parts storage system with L-BOXX Mini (2 pieces). This makes the case optimally equipped for installation and service work in the electrical sector.

The case also features a TSA combination lock, a labeling field, and a spring-loaded handle.

Length (mm)	495 mm
Width (mm)	300 mm
Height (mm)	420 mm
Weight (kg)	12,6 kg

Attribute	Value
Number of pliers	5
Number of cable cutters	3
Total number of tools	31
Electrician set	Yes
Heating/plumbing installer set	No
Packaging	Koffer
Number of Phillips PH cross screwdrivers	2
Number of slotted screwdrivers	3
