

CIMCASE PRO TROLLEY INDUSTRY B1T2

Article number: 178620

The CimCase PRO Trolley Industry B1L2 is a robust tool case for professional use in electrical installation. The base tray, which is up to 150 mm deep, offers maximum capacity for extensive tool equipment, drill bits, measuring devices, and accessories. Thanks to the integrated trolley function with extendable handle, the case is particularly suitable for longer distances on construction sites or in industrial plants and ensures comfortable transport even with heavier loads. Inside, three functionally designed, interchangeable tool panels provide clarity and flexibility. One panel has a holder for an L-BOXX Mini and a neoprene bag for safely transporting a spirit level, while two other panels are equipped with generous pocket holders for hand tools. The modular system allows individual adaptation to different areas of application. The industry configuration (33 pieces) is tailored to applications in industry and maintenance. It includes powerful pliers and cutting tools, VDE-insulated tools for live working, screwdrivers in various profiles, switch cabinet keys, and additional accessories for maintenance and service work in industrial plants. The equipment also includes a TSA combination lock, a labeling field, and a spring-loaded handle.

Length (mm)	495 mm
Width (mm)	300 mm
Height (mm)	420 mm
Weight (kg)	12,8 kg

Attribute	Value
Number of pliers	3
