

CIMCASE PRO TROLLEY T3, LEATHER CASE

Article number: 178650T3

The CimCase PRO Trolley T3 empty case is the ideal solution for electricians and industrial electricians who value high mobility and flexible tool organization. The PRO Trolley series combines maximum storage capacity with comfortable transport ideal for construction sites, service calls, or industrial facilities. The 150 mm deep base tray offers generous space for tools, measuring devices, or accessories. Thanks to the integrated trolley function with extendable handle, the case can be transported comfortably and without straining your back, even when heavily loaded.

Inside, three tool panels with pocket holders ensure clear and flexible organization. One of the panels is additionally equipped with a neoprene pocket for the protected storage of a spirit level. The pockets allow quick access to frequently used tools and offer variable configuration options.

The modular panel system allows the tool panels to be exchanged or individually combined as required. This means that the case can be optimally adapted to different areas of application and working days. Features include a TSA combination lock, a labeling field, and a spring-loaded handle. The CimCase PRO Trolley T3 is the perfect basis for flexible, mobile, and professionally organized tool equipment.
