

## CABLE TEST BADGE "NEXT TEST" - YELLOW, VINYL FOIL

**Article number: 182647**

The cable inspection sticker "Next inspection" is used to clearly mark inspection and maintenance dates for cables and wires. It supports clear documentation of the tests carried out and makes it easier to comply with prescribed test intervals. The test sticker is made of robust vinyl film and is yellow in color, making it highly visible. An integrated month and year field enables individual marking of the next inspection date. The marking can be done flexibly and permanently using punch pliers or a foil pen. They are supplied in a practical booklet, which ensures easy handling, clean storage and quick removal of the cable test tags. Ideal for professional use in industry, trade and for testing and maintenance work.

|             |          |
